It offers quick financial and other math calculations with two ways to review your results: the large display or the roll tape. Plus, a 12-character display makes reading your numbers easy, and special function keys help increase your accuracy as you enter long columns of data. You can rely on Canon for consistent reckonings. Large, easy-to-read numeral keys let you type speedily. Use the rounding function to automatically round your results up, down, or off by a specified number of digits. Keep running totals, calculate taxes with a prestored tax rate, or use one of the many basic functions: addition, subtraction, multiplication, division, constant multiplication, division and percentage calculations, percentage add-on, and discount calculations. A two-color printer produces crisp characters with negative numbers appearing in red and positive in purple; it is designed for plain paper printing. Large, contoured keytops simplify data entry, and the two-color serial impact printer produces negative numbers in red and positive numbers in purple. What's more, numerals on the keytops are large and easy to read for clear identification. The double zero 00, triple zero 000, item count, and non-add print keys have been added to save time and improve accuracy. To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. I like it so much, I wanted to purchase the exact same model for when my current one quits functioning. The ink roller is easy to replace and still readily available. It has many great features and the one I use the most is the Tax calculation button. Allinall, this has been a great calculator that has lasted well over twenty years. I was delighted to find that I didnt have to learn to operate a different one! The keys are a comfortable size, the display is large, operation is simple and straightforward, printing is in two colors, and it has more features than needed for my small retail business. I would definitely recommend this to anyone who needs a great basic calculator. I would recomend this for anyone it is easy to use. Not only does it do all my math perfectly, it also prints clearly and quickly. The keys are a good size and are very responsive.
