

## C Series Garden Tractor - Wheels and Tyres

### TYRES AND WHEELS

C Countax Tractors are fitted with grassland tyres that are designed to present a large area to the ground for grip and are of soft profile to prevent marking your turf. They are of thicker section and tougher than most 4 ply tyres. Persistent punctures and tyre deflation are nevertheless a problem experienced by around 5% of Countax customers. This is not a problem just for Countax owners - it is shared by the users of all types of off-road machinery fitted with pneumatic tyres. In practically every case there is a common cause - THORN'S! Blackthorn, Hawthorn and Rose are usually at the bottom of the problem and will puncture any tyre not fitted with very expensive guards.

There are less expensive ways to overcome this problem - so check and avoid these possible causes:

1. The rim of the wheel has been damaged - breaking the seal on the tubeless tyre. There are two possible solutions:
  - If the damage is not severe, treat with Countax Tyre Sealant (Pt No. 52903501).
  - If the damage is significant - order a new wheel from your dealer.
2. If you have Hawthorn, Blackthorn or Wild Rose in your hedges - this will puncture any tyre. It makes sense to check any area you intend to cut or drive over and to remove any branches.

The long-term solution is to treat all four tyres with Countax Tyre Sealant - follow the instructions on the bottle.

### IF YOUR TYRES SPIN OR LOSE GRIP CHECK:

1. Are the tyres correctly inflated? - check pressures on back page.
2. Are you going too fast for the conditions?

### REMOVAL OF FRONT WHEEL - Fig 58

1. Apply Parking Brake.
2. Place chocks under all wheels that are to remain on the ground.
3. Remove the hubcap.
4. Use a 3/4" socket/spinner and ratchet to slacken off the wheel nut - do not remove!
5. Place a jack under the front axle (Fig 58) and jack up until the wheel to be removed is well clear of the ground.
6. Remove the nut and washers and keep safely.
7. Pull off the wheel carefully - Taking care not to dislodge the Tractor from the jack.

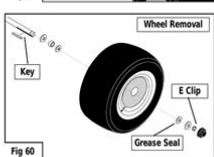

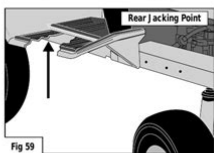

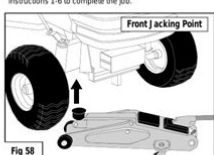

When the tyre is repaired, replace the wheel preferably using a new 1/2" Nyloc nut (Part No. 64822400). Tighten to a torque setting of 5.25kg m (38lbft).

### REMOVAL OF REAR WHEEL - Fig 59 & 60

1. Apply Parking Brake.
2. Place chocks under the wheels that are to remain on the ground.
3. Place the jack under the jacking point on the chassis and raise until the wheel is well off the ground.
4. Remove the hubcap.

5. Using a flat ended screwdriver, lever off the 'E' clip and remove the washers (Fig 60).
6. Pull off the wheel carefully taking care not to dislodge the tractor from the jack.
7. Remove the key from the wheel hub, first removing the grease seal from the front of the hub using a small screwdriver (keep safe with the key, 'E' clip and washers).

When the tyre is repaired, fit the wheel onto the shaft; line up keyways and tap in the key. Pull the wheel forward off the shaft until the grease seal recess is just clear and refit the seal. Then slide the wheel fully on the shaft. Reverse instructions 1-6 to complete the job.

They are the preferred choice for gardens featuring large lawns, orchards, paddocks and slopes. They are designed to cut and collect wet grass, remove lawn debris, create the perfect striped lawn finish, or tackle the tallest nettles and brambles. With a Countax tractor mower, you can achieve total garden care whatever the weather or season. <http://cumalierginyurekinsaat.com/userfiles/fisher-price-take-along-hop-n-pop-manual.xml>

- **countax k1850 user manual, countax k1850 user manual.**

Built to a higher specification and with a host of features, it's ideal for areas up to 3.5 acres depending on model. Packed with all the premium features of a standard C Series, but with the addition of fourwheel drive functionality. It is ideal for mowing gardens of three acres or more. It leaves a fantastic cut on the lawn. I would definitely recommend a Countax rideon to any one who loves a great looking garden. Built like a tank and seems to collect the grass clippings than my last machine. The feature to interchange the tools in the back of the machine is great. I cant wait to buy some more accessories. It leaves a fantastic cut on the lawn. I cant wait to buy some more accessories. But it's not as simple as that. It has been stored for the last year and was working fine cutting well and driving OK. Then I had a problem with the drive jerking and I am told it needs the clutch adjusting, the gearbox was new three years ago and it has done little work since I ve had it. The cutting deck is fine no holes or cracks, blade if fine, and belts all Ok. It comes complete with grass collector and powered sweeper all working OK. I have listed this as spares or repair as it is not usable as it is at present. Also have CD user manual and parts manual. It will need to collected, Dimension are 90 inches long with collection box 2.29m 33 inches wide 832mm It needs a new starter selonoid, a replacement rubber fuel pipe it is split where it attaches to the carb possibly a new battery,small square of clear perspex for collection box window, the clutch adjusted and maybe a lick of paint here and there. Viewing is possible if you contact me via ebay. Cash on collection please no PayPal. Used But In Good Working Order. C Series Garden Tractor. Garden Tractor Lawn Mower pdf manual download. Please note that we can not be liable for theft of parcels if you provide alternative delivery instructions. Your invoice and warranty will be supplied in your parcel please keep these documents for future records. Thats it! Your battery is supplied tested, fully charged and ready to fit! You must check your existing battery and check the dimensions and terminal layout. No guarantee is provided for their accuracy before checking your existing battery first and selecting the appropriate battery listed. If you are unsure on the product you require please contact us before ordering. Privacy Notice. International editionUK editionUS editionAustralia editionInternational editionMoreUK editionUS editionAustralia editionAfter the final time, I demanded a refund but the US company seems to be ignoring me Photograph Alamy Stock PhotoMy local dealers recommended a new Countax fourwheel drive with chevron tyres. I bought one, paying more than 5,000. The dealer took it away and fixed it. On its return the same thing happened again. This time I complained to Countax, which assured me the problem was fixed. Because of these assurances I turned down its offer of a replacement machine. This time I insisted on a replacement. It took weeks to be delivered. Three times I spoke to Countax to make sure the machine had chevron tyres; when it was finally

delivered it had the wrong tyres. Finally it arrived in July. It looked good, felt safe and cut well. After an hour or so, however, I was facing up a grassy slope when it stopped and began to move backwards at increasing speed. Behind me was a fence, immediately beyond which is a stream in a deep ravine. Fortunately, by using the parking brake, I managed to stop short of the fence. I have told them that I want my money back plus some further compensation. All have made promises but then failed to get back to me.
